Announcement No. 13

NetTest Enters Agreement With Austrian tele.ring

tele.ring, one of the four mobile operators in Austria, has selected NetTest's masterQUEST to monitor its network infrastructure including its fixed, GSM and components of its GPRS network. Being selected by tele.ring further strengthens NetTest's leading position with GSM networks in Central Europe.

The agreement amounts to EUR 1 million, but the contract is not expected to influence NetTest's earnings forecast.

About tele.ring

tele.ring is the first full-service provider in Austria with its own network which integrates mobile, fixed-line and internet into convincing complete solutions. tele.ring is a 100% affiliate of Western Wireless International Corporation (WWI), a globally operating affiliate of Western Wireless Corporation (WWC) founded in 1994, which in turn is one of the leading telecom providers in the US.

About NetTest

NetTest is a leading worldwide provider of testing, monitoring and management systems across both the optical and network layers of communications networks. NetTest provides network operators, network equipment manufacturers, component manufacturers and enterprise service providers with network testing solutions.

NetTest is a GN Great Nordic company. GN Great Nordic also comprises the internationally expanding technology companies GN Netcom and GN ReSound. GN Great Nordic is listed on the Copenhagen Stock Exchange.
