### **Stable development in uncertain business climate**

- Improved earnings in holdings
- Pre-tax profit SEK 397m (1,898)
- Hilton, Esselte, Exceed and Kronans Droghandel sold
- Total return on Ratos shares +21%

#### **Important events**

Four exits were completed during the period for a total sales amount of approximately SEK 1,750m.

The entire holding in Hilton Group plc was sold in the first quarter for SEK 614m. The deal provided an exit gain of SEK 50m.

On 7 June, Ratos sold its entire holding in Esselte to the American private equity fund J.W. Childs which had made a public offer for the whole of Esselte two weeks earlier. The purchase price amounted to SEK 520m and the deal provided a SEK 98m exit gain.

The sale of the wholly owned subsidiary Exceed to Wilson Logistics Group was completed during the period. The purchase price amounted to approximately SEK 160m which meant that Ratos made a capital gain of approximately SEK 90m.

During the period the sale of the holding in Kronans Droghandel was approved by the relevant competition authorities. The purchaser was the Finnish company Orion and the purchase price received by Ratos amounted to SEK 460m and had a positive impact on earnings for the period of SEK 54m, taking Kronans Droghandel's sale of the Norwegian operations into account.

Martinsson, Lindab and Superfos made important strategic follow-on acquisitions during the period. In March Ratos made a DKK 66m follow-on investment in Superfos in connection with the acquisition of Jotipac. A SEK 159m follow-on investment in Arcorus was made in April which increased Ratos's holding from 49% to 77%.

After the end of the period payments were made to owners in Telia Overseas following an earlier decision to reduce the company's share capital. For Ratos, which owns approximately 9% of the capital, this payment corresponded to SEK 264m. Telia Overseas' book value in the Ratos Group therefore decreased to SEK 64m.

### Development of the portfolio

The global economy continued to show weak development in the first half of 2002 although there are still major differences between regions and sectors. Nevertheless, Ratos's holdings overall showed a satisfactory earnings trend. The combined EBITA (profit before net financial items, tax and goodwill amortisation) for the subsidiaries and associated companies held by Ratos at the end of the period increased by 13% compared with the first half of 2001. Taking Ratos's different stakes into account, EBITA rose 9%. The corresponding changes in EBT (profit before tax) are +30% and +32% respectively.

This positive earnings trend was achieved despite many of the holdings operating in a tough market. In several of the companies this was due partly to the extensive action programmes which were launched in 2001 and are now starting to have an effect and partly to new adjustment programmes which were speedily introduced during the year when the sales trend failed to meet expectations.

In general, development for the holdings can be summarised as stable in an uncertain business climate. Five holdings provided pleasant surprises. Dynal Biotech continued its powerful expansion with sustained good margins. Industri Kapital listed three companies which led to favourable value development. Hilding Anders succeeded in maintaining earnings at a good level despite a combination of some highly recessionary markets, primarily Germany, negative currency effects and serious disruptions in one production unit due to flooding. The positive trend for Superfos continued due to a combination of ongoing action programmes and strong development for recently acquired Jotipac. Distribution of funds from Telia Overseas, together with a favourable situation in remaining portfolio holdings, led to a trend which differs positively from the telecom sector in general.

Development for four holdings was less favourable than expected. Atle Industri continues to show weak earnings. However, extensive efforts are under way here, both at Atle Industri and portfolio company level, to handle these problems and a positive EBITA and EBT were achieved in the second quarter. At Gadelius the newly appointed CEO has started extensive efforts to reverse the downward trend for order bookings. DIAB encountered problems in the first half in both its main markets – pleasure boats in the US and the wind power industry – although an improvement can now be seen in the order books. A cost reduction programme has been initiated to improve profitability. At Intervect, efficiency enhancement measures are continuing to provide results and the company's full year result will be positive and considerably better than last year. Nevertheless, development in the second quarter was a disappointment and additional action programmes will now be carried out.

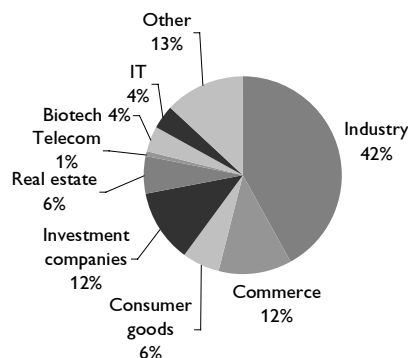

To facilitate analysis an extensive table is provided on page 18 with key figures for all the holdings. A summary of profit and loss accounts and balance sheets for Ratos's unlisted associated companies and subsidiaries is available at [www.ratos.se](http://www.ratos.se) in downloadable Excel files.

#### Holdings, size breakdown

After the end of the period the number of holdings totalled 21.

#### Holdings, sector breakdown

The portfolio has a relatively good spread in terms of sectors and holding size.

### Ratos's results

The Group's profit before tax amounted to SEK 397m (1,898). This result includes profits and share of profits from the holdings of SEK 115m (87). The SEK 353m (1,753) exit gain mainly relates to the divestment of the holdings in Esselte, Exceed, Hilton and Kronans Droghandel (previous year mainly Scandic Hotels).

### **Parent company**

The parent company's pre-tax profit amounted to SEK 259m (2,262). The parent company's liquid assets at the close of the period were SEK 27m (23). Including proceeds not yet received from the sale of shares, liquid assets amounted to SEK 1,270m. Interest-bearing liabilities amounted to SEK 227m.

### **Accounting principles**

This interim report is prepared in accordance with the Swedish Financial Accounting Standards Council's recommendation RR20. The Council's recommendations are applied with effect from 2002. These have not had any effect on the Group's interim report. Otherwise the Group applies the same accounting principles and calculation methods as those used in the 2001 Annual Report.

### **Reporting the Atle acquisition**

At the beginning of May 2001, Ratos and the British company 3i acquired Atle via a 50/50 owned company. The Atle holdings are to be transferred to the parties as conditions for such transfers are met. The financial implications of the agreement are that Ratos acquired shares in 12 companies. Some of these are owned by both Ratos and 3i. In addition, 3i alone acquired 85 holdings from Atle. The remaining Atle holdings were placed in Atle Industri which is controlled equally by Ratos and 3i. At the end of the period under review two companies had not been transferred to Ratos and 3i since the conditions for these transfers had not yet been met.

<sup>1)</sup> The planned transfer of the holding from Atle to Ratos had not been completed by the end of the period, since the conditions for the transfer had not yet been met.

<sup>2)</sup> Atle Industri is not a legal group. Since the extent of the group has been modified since year-end, shareholders' equity has changed.

<sup>3)</sup> 2001 full-year and half-year figures for Dynal and Lindab were pro forma for the group including holding company, i.e. incl. goodwill amortisation and net financial items in the holding company.

<sup>4)</sup> Giga Consulting's previous figures pertain to Yarrow.

<sup>5)</sup> The consolidated value includes a convertible debenture loan of SEK 63m.

<sup>6)</sup> Gadelius is owned via a Dutch holding company. These figures exclude the holding company.

<sup>7)</sup> The consolidated values relate to value in the event of planned but not completed transfers from Atle to Ratos.

<sup>8)</sup> Excluding Telia Overseas which is not an associated company.
