- The Group's profit after financial items was MSEK 2,564 (2001: 2,294). Holmen Paper’s operating profit declined by MSEK 746, while Iggesund Paperboard's increased by MSEK 363. The figure for 2001 included negative items affecting comparability of MSEK 620.

The Group's profit for the fourth quarter amounted to MSEK 611 (Q3, 2002: 676). The fourth quarter operating profits for Holmen Paper and Iggesund Paperboard were MSEK 156 and MSEK 22 lower respectively than for the third quarter, whilst Holmen Skog's operating profit was MSEK 93 higher.

- The profit after tax was MSEK $1,959(2,186)$. The return on equity was 13.7 per cent (16.0).
- The Board proposes payment of a dividend of SEK 11 (10) per share.
- The market situation for newsprint and magazine paper remained weak during the fourth quarter. Holmen Paper's deliveries increased slightly, but production continued to be restricted. Prices were unchanged for the fourth quarter. Prices will be lower in 2003, but the negotiations have not been finalised.

The market situation for paperboard was stable during the fourth quarter. Iggesund Paperboard's deliveries showed a seasonal decline. Price increases have been implemented.

| Deliveries, 1,000 tonnes | $\mathbf{4 0 4}$ | 396 | $\mathbf{1 , 5 2 8}$ | 1,525 |

The market situation for newsprint and magazine paper remained weak during the fourth quarter. The advertising market is still weak and publishers are taking measures to lower costs. Deliveries of newsprint to Western Europe were 6 per cent lower than in 2001. The decline in deliveries from West European producers was 2 per cent thanks to higher exports to markets outside Western Europe. The demand for SC and coated printing paper was more stable, but additions to capacity led to a reduction in capacity utilisation.

Holmen Paper's deliveries remained unchanged in 2002 in relation to 2001. Lower deliveries to Western Europe were offset by an increase in exports to non-European markets. During the fourth quarter deliveries were 2 per cent higher than during the third quarter, but production continued to be restricted. Prices were unchanged for the fourth quarter. Prices will be lower in 2003, but the negotiations have not been finalised.

The operating profit for 2002 amounted to MSEK $1,664(2,410)$. The decline in the result is mainly due to lower prices, which were partly offset by favourable currency effects. The figure includes a net amount of some MSEK 60 owing to higher costs associated with the commissioning of the new newsprint machine and the income from the sale of the old machine at the Hallsta Paper Mill.

The fourth quarter operating profit was MSEK 337 (Q3, 2002: 493). The decline is mainly due to seasonally higher costs.

| Deliveries, paperboard, 1,000 tonnes | $\mathbf{1 1 2}$ | 121 | $\mathbf{4 5 3}$ | 410 |

The market situation for virgin fibre-based paperboard was stable during the fourth quarter. Deliveries to Western Europe rose by one per cent for 2002 as a whole. However, deliveries by West European producers increased by 4 per cent as a result of higher exports to markets outside Western Europe.

Iggesund Paperboard's deliveries rose by 10 per cent in relation to the previous year. During the fourth quarter, deliveries showed a seasonal decline of 7 per cent. Iggesund Paperboard has implemented price increases in Europe, which has had some effect in the fourth quarter and will show through in full after the turn of the year.

The operating profit for the full year was MSEK 818 (455). The improvement is due to higher deliveries, lower costs and favourable currency effects.

The fourth quarter operating profit amounted to MSEK 210 (Q3, 2002: 232).

The market for sawn redwood products remained unchanged during the fourth quarter. The operating result for the full year was a loss of MSEK 6 (loss: 79). The improvement is mainly due to lower costs. The fourth quarter result was a profit of MSEK 3 (Q3, 2002: loss 1).

The operating profit for 2002 was MSEK 450 (455). Harvesting in company forests increased, while lower wood prices and higher harvesting costs had a negative effect on the result. The fourth quarter profit increased by MSEK 93 to MSEK 155, mainly an effect of a higher volume harvested in company forests and a seasonal decline in costs.

Holmen Skog's earnings are largely generated by the sale of wood harvested in the company's forests.

| GWh | $\mathbf{3 0 7}$ | 221 | $\mathbf{1 , 3 2 0}$ | 1,578 |

The operating result for the year as a whole was a loss of MSEK 26 (profit 49). The deterioration in the result is mainly due to lower production of hydroelectric power at the company's power stations as a result of a reduced inflow of water. The fourth quarter result improved by MSEK 8 as a result of higher production of hydroelectric power at these power stations.

Holmen Kraft's earnings are largely generated by the production of electric power in wholly and partly owned hydroelectric power stations. As a result of the buy-back and the consolidation of hydroelectric power stations the financing costs will be stated under net financial items as of 2003. These costs amounted to MSEK 164 in 2002, and were included in Holmen Kraft's result.

The Group's exposure to changes in electricity prices in the future is reduced by the use of hedging. Almost all the estimated net consumption in Sweden in 2003 and 2004 has been hedged. Half of the estimated consumption in 2005 has been hedged, and around one-third of that for the 2006-2011 period.

## PRESS RELEASE

## FINANCING

The cash flow before capital expenditure and dividend amounted to MSEK 3,692. Capital expenditure amounted to MSEK 3,191 and the dividend to MSEK 800. The fourth-quarter cash flow before capital expenditure was MSEK 1,018 and capital expenditure was MSEK 1,944, of which MSEK 1,705 relates to the buy-back of hydroelectric power assets.

The Group's net financial debt amounted to MSEK 3,808 (31 December 2001: 3,161). The debt/equity ratio was 0.25 ( 0.22 ). The equity ratio was 56.3 per cent (56.4).

Holmen's sales consist mainly of exports from Sweden. The Group has hedged the major part of the currency exposure for 2003. For 2004, approximately 70 per cent of the estimated flows in euro, and 50 per cent of the flows in sterling are hedged. For 2005, approximately 50 per cent of the cash flow in euro are hedged. The average hedged exchange rate is $9.38,14.86$ and 10.35 for the euro, sterling and the US dollar respectively.

## CAPITAL EXPENDITURE

The Group's capital expenditure amounted to MSEK 3,191 (1,715), of which MSEK 774 relates to the new paper machine at the Hallsta Paper Mill and MSEK 1,705 to the buy-back of hydroelectric assets. Depreciation according to plan amounted to MSEK 1,153 (1,126).

## EMPLOYEES

The average number of employees in the Group was 5,075 (full year 2001: 5,238).

## DIVIDEND AND SHARE BUY-BACK

The Board proposes to the Annual General Meeting to be held on 26 March that a dividend of SEK 11 (10) per share be paid. 31 March is proposed as the date of record for entitlement to the dividend.

The Board also proposes that the Annual General Meeting mandates the Board, as it did last year, to buy back and transfer company shares.

## IMPORTANT EVENTS

- The Holmen Board decided at today's meeting to postpone until further notice the decision to build a new newsprint machine at Papelera Peninsular, the Group's Spanish mill. The main reason for this is that the recovery of the newsprint market appears to be taking longer than expected. The pre-project will be completed and it is intended to go ahead with the necessary land purchase.
- Holmen has appealed against a decision handed down by the tax authority in December 2002 concerning the tax surcharge imposed on one of Holmen's subsidiaries. The aggregate amount of taxes and charges is some MSEK 500. The company does not share the tax authority's view on the case, but considers that it has already been subject to legal process and settled. The tax authority investigated the matter back in 1998, at which time it did not allow the deduction. The company appealed against the decision. The county administrative court ruled in the company's favour, and approved the deduction in its decision of May 22, 2001. The decision was not appealed against by the tax authorities, and has thus come into legal effect. The company sees no reason for a surcharge, nor does it agree with the opinion of the tax authority in other respects. In light of this, Holmen has not made any provision for tax in respect of this tax surcharge decision.

## PRESS RELEASE

- Holmen has bought back the partner financed company Junkaravan AB on 31 December 2002, which means that Holmen has acquired hydroelectric power assets corresponding to 541 GWh for MSEK 1,705. Holmen retains the partner financing of Iggesund Kraft, which owns hydroelectric power assets corresponding to 170 GWh . Holmen owns 50 per cent of Iggesund Kraft AB and has consolidated the company as of 31 December 2002.
- Pension funds set up by the Group's English companies showed a deficit of MSEK 391 as of 31 December 2002. The Group has stated this as a contingent liability in the consolidated financial statements.

Stockholm, 5 February 2003

Göran Lundin
President and CEO

The year end report has not been subject to examination by the company's auditors.
The 2002 annual report will be published at the beginning of March.
The Annual General Meeting will be held in Stockholm on 26 March at 16.00 hrs CET.
The interim report for January-March will be released on 7 May.

Holmen is a forest products industry group with the capacity to produce 2.3 million tonnes of paper and paperboard per year. The EU countries, which account for some 85 per cent of the Group's turnover, are by far the largest market. Holmen Paper produces paper for daily newspapers, magazines, directories and advertising matter at three Swedish mills and one Spanish mill. Iggesund Paperboard produces paperboard for packaging and graphic purposes at two Swedish mills and one English mill. Iggesund Timber produces sawn timber at one Swedish sawmill. Holmen Skog manages the Group's one million hectares of forests. The annual volume harvested from company forests is 2.5 million $\mathrm{m}^{3}$. Holmen Kraft produces some 1,100 GWh of electricity at wholly and partly owned hydroelectric power stations in Sweden.

## ACCOUNTING PRINCIPLES

The year end report is made up in accordance with the Swedish Financial Accounting Standards Council's recommendation RR20 Interim reporting. In other respects, the accounts are also made up in accordance with the Council's recommendations. No accounting principles have been altered that have an effect on this report, in relation to the principles applied in the latest annual report. However, Holmen has adopted a new position regarding the degree of control exercised over Iggesund Kraft, and has therefore consolidated the company as of 31 December 2002, instead of using the equity interest method. As the change has no significant effect on the consolidated result or on equity, no adjustments have been made to the figures for 2002 or the year in the comparison.

The Group's pledged assets increased in 2002, mainly because Junkaravan AB, which was acquired as of 31 December 2002, has financial liabilities that are secured by a lien on its fixed assets. The Group's contingent liabilities have risen, partly due to the tax authority's decision to impose a tax surcharge of MSEK 538 on one of Holmen's subsidiaries, and partly as a consequence of the under-capitalisation by MSEK 391 of the Group's pension funds in England.
